接口文档

错误处理

错误以 HTTP 状态码形式表示

Response Body

```
{
    "status":401, // 对应的状态码
    "msg":"错误信息,直接显示给用户",
    "data":null
}
```

统一错误

401: 用户未登录

500: 服务器错误

U. 用户部分

U1.登录

```
POST /user/login
```

Request Body

```
{
    "username": "用户名",
    "password": "密码"
}
```

Response Body

```
{
    "status": 200,
    "msg": "OK",
    "data": {
        "token": "未完善,使用用户昵称"
    }
}
```

错误

400: 两次输入密码不一致

409: 用户已存在

D. 设备部分

D1.添加设备

```
POST /device/add
```

Request Body

```
{
    "name": "设备名称",
    "type": "设备类型",
    "region": "设备区域",
    "begin": "运行开始时间",
    "end": "运行停止时间"
}
```

Response Body

```
{
    "status": 200,
    "msg": "OK",
    "data": null
}
```

D2.删除设备

```
POST /device/delete
```

Request Body

```
{
    "device_id": "设备id"
}
```

Response Body

```
{
    "status": 200,
    "msg": "OK",
    "data": null
}
```

D3.修改设备

```
POST /device/updata
```

Request Body

```
{
    "device_id": "设备id",
    "name": "设备名称",
    "type": "设备类型",
    "region": "设备区域",
    "begin": "运行开始时间",
    "end": "运行停止时间",
    "status": "设备状态"
}
```

Response Body

```
{
    "status": 200,
    "msg": "OK",
    "data": null
}
```

D4.改变设备状态

```
POST /device/change
```

Request Body

```
{
    "device_id": "设备id"
}
```

Response Body

```
{
    "status": 200,
    "msg": "OK",
    "data": null
}
```

D5.获取设备列表

```
POST /device/list
```

Request Body

```
{}
```

Response Body

S.服务器部分

S1.Port

数据库默认连接端口: 3306socket使用端口: 5000

• mqtt使用端口: 1883

• mqtt服务器地址: 47.112.96.50
